Q-2 Read the following passage carefully and answer the questions given at the end. (10)

Once a stag was drinking at a stream. He happened to see his reflection in the water. He was pleased to see his beautiful horns, but when he saw his thin legs, he felt sad as he thought they were ugly. Suddenly, he saw a pack of hounds at a distance. He ran as fast as his legs could help him. Soon he left the hounds far behind. He had to pass through a thick forest of bushes. His horns got caught in a bush. He tried hard to pull his horns out of it but all in vain. By now the hounds had come up. They fell upon him and tore him to pieces.

The camel is rightly called the “ship of the desert”. It is the best means of transport in deserts. Camels go slow, but they go on walking for hours on the burning sand and in the blazing sun. Camels carry heavy loads, much heavier in weight than any other beast of burden can. While the other animal’s feet sink into the sand, nature has made the feet of the camel such that it is not at all difficult for it to walk on the sand. The camel is superior to all other animals because it can go without food and water for days and weeks. It can store food and water. Its hump is also a store of food ,which the camel uses when it gets nothing to eat and drink for many days .In deserts ,only bushes grow here and there and the camel can live on these.

- How does the camel go without food and water for days and weeks?
- What difficulty do the other beasts of burden have to face while walking on the sand?
- Why does a camel walk easily on the loose sand of the desert?
- What special quality makes the camel superior to other animals used for transport?
- What does the camel generally live on?
